The Top Eight Benefits of Cloud

Whatever size business you're in, the advantages of cloud computing are too good to ignore.
With choices of public, private and hybrid clouds, the key is selecting the right mix for your business needs.
We'll help you sort through the many options and find the solution that's right for you.

1 MOVE CAPEX TO OPEX
Pay for IT like you pay for your utilities and eliminate the need for a large capital outlay to get started or remain up-to-date.

2 LOWER CAPITAL EXPENSES
Want to maintain ownership of your data, on premise, in a private cloud? We offer a rental program to keep things in top shape and minimize your capital investment.

3 IMPROVE SECURITY
Today's public, private, and hybrid clouds offer safe and affordable built-in security you can count on.

4 INCREASE FLEXIBILITY
Access work-related files and information from any device, in any place, at any time.

5 REDUCE DOWNTIME
Your uptime is critical and when applications go down, it can be costly. With cloud, you can keep the right systems running when you need them.

6 DECREASE DATA LOSS
Reduce the potential for data loss with backups happening all day, instead of once a day.

7 GET THE LATEST TECHNOLOGY
Keep everyone working on the latest operating systems and applications with automatic updates. And whether you own or you rent the components, you'll receive only the latest technologies from leading vendors.

8 GO GREEN
Reduce your on-premise power consumption and cooling needs as professionally-managed centers maximize efficiencies.

BUNDLE IT ALL UNDER MANAGED SERVICES
Whether you're a cloud customer or benefitting from any additional StoredTech services, we can tailor your solution and bundle everything together in one monthly fee.

CERTIFIED MICROSOFT CLOUD SOLUTION PROVIDER
As a proud partner of Microsoft, we're able to directly provide you with Microsoft's industry-leading cloud-based solutions. These include public cloud platform (Azure), platform tools (Microsoft Intune and Enterprise Mobility Suite), and business and productivity applications (CRM Online and Office 365).
